HIDRAVLIČNA DVIŽNA MIZA rešitev za specifično delovno mesto

Hidravlična dvižna miza z naklonom / Hydraulic lifting table with gradient

- lastno načrtovanje in izdelava po naročilu
own production and custom made
- specifične prilagoditve nakladalne površine, višine in kapacitete dviga (nosilnost), glede na potrebe
specific adjustment of the loading surface, height and lifting capacity, according to the needs
- varnostna letev, varnostni ventil in varnostna stikala
safety strips, safety valve and safety switches
- upravljanje preko omarice za krmiljenje (glavno stikalo, tipki GOR/DOL in izklop v sili)
electrical control box (main switch, up/down button and emergency off switch)

Dimenzije / Dimensions: custom made

Inovativna rešitev za specifične potrebe / Innovative solution for specific needs

Specifična uporaba na delovnem mestu / Solution for specific workplace

- kompakten hidravlični agregat
compact hydraulic power unit
- prašno barvana jeklena konstrukcija
High quality powder coating steel construction
- specifična uporaba za paletni voziček z mrežasto boks paletu
specific use for pallet trolley with mesh box pallet
- prilagodljiva dvižna višina in kot nagiba (UHT-001 9003)
flexible lifting height and tilting angle

HIDRAVLICNA DVIŽNA PLOŠČAD za specifične potrebe v delovnem procesu

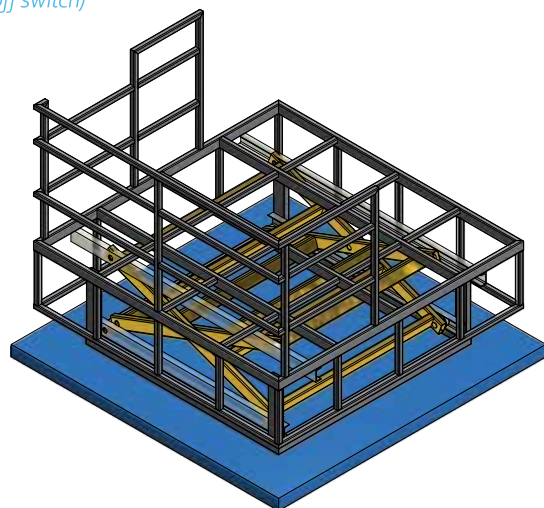

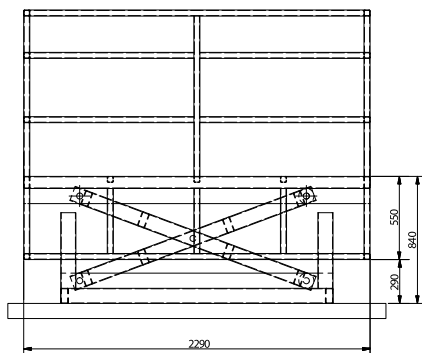

Namenska, specifična uporaba / Designed for specific use

- lastno načrtovanje in izdelava po naročilu
own production and custom made
- varnostna zaščita dviznega mehanizma oz. strižne cone
safety protection of the lifting mechanism (shear zone)
- specifične prilagoditve dvizne ploščadi, višine in kapacitete dviga (nosilnost), glede na potrebe
specific adjustment of the lift platform, height and lifting capacity, according to the needs
- upravljanje preko omarice za krmiljenje (glavno stikalo, tipki GOR/DOL in izklop v sili)
electrical control box (main switch, up/down button and emergency off switch)

Uporaba hidravlične dvižne ploščadi v delovnem procesu / Hydraulic lifting platform in use

- Rešitev za dvigovanje in spuščanje bremen in/ali ljudi, ki ne presegajo skupne dovoljene max. obratovalne obremenitve. Značilna področja uporabe so na primer v proizvodnem procesu, kjer dvižna ploščad omogoča dvig delavca z orodjem na določeno delovno višino za podajanje in skladanje sestavnih delov v proizvodnem procesu, vzdrževanje strojev, dviganju tovorkov ipd.

Solution for lifting and lowering loads and / or people who do not exceed the permissible max. capacity.

Typical applications are for example in the production process:

- for lifting workers with tools in a certain working height
- for feeding and stacking of components
- for maintenance of machines,
- for lifting packages, boxes or palletes
- ...

ekonomične dvižne rešitve
economical lifting solutions

Varna in učinkovita uporaba / Safe to use and efficient in functioning

ENOTIRNE PROGE

dvig in prenos bremena po isti liniji

Dvižna rešitev za proizvodne procese / Lifting solution for production process

- načrtovanje in izdelava glede na potrebe
own production and custom made
- idealna dvižna rešitev za proizvodne procese, ki zahtevajo dvigovanje in premikanje izdelkov vzdolž fiksne poti
ideal lifting solution for production processes that require lifting and moving products along a fixed path
- predstavlja alternativno rešitev na delovnih mestih, kjer ni prostora za vgradnji mostnega dvigala
Monorails also serve as a material handling alternative in places that cannot accommodate a bridge crane.
- primer uporabe na montažnih linijah ali na delovnih postajah, kjer je potreba po linijskem prenosu materiala (npr. prašno barvanje,...)
Examples include assembly operations, transport of materials to workstations and lines where parts are blasted, painted or coated,...
- proge so lahko izvedene ravno ali z zavoji (radius)
tracks can be in line or with curves (radius)
- vgrajena mejna stikala za dvig-spust, vožnjo vitla in vožnjo dvigala ter varovanje proti preobremenitvi
integrated limit switches for lift-lower, driving hoist and driving crane; overload protection
- gibanje kavlja omogočeno po dveh oseh: naprej/nazaj po enotirnem nosilcu z mačkom, gor/dol z nameščenim vitlom
Monorail cranes provide only two axes of hook movement: up/down via the hoist and forward/back via the monorail beam

Višina dviga in nosilnost glede na potrebe / Lifting height and capacity according to the needs

LIFTING EQUIPMENT

MONORAIL CRANES

lifting and moving products along a fixed path

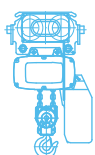

Zagotovljena stabilnost dviganja in premikanja vzdolž fiksne poti / Great stability of lifting and moving along a fixed path

- nosilnost glede na potrebe
load capacity according to need
- robustna jeklena konstrukcija barvana v željenem RALu
High quality powder coating robust steel construction
- upravljanje preko viseče tastature ali radijske komande
manage through drifting keyboard or radio control
- montaža na strop, steno ali prostostoječe s podpornimi stebri
free standing, wall mounted or suspended

ekonomične dvizne rešitve
economical lifting solutions

veržni ali vrvi vitel

STEBRNA VRTLJIVA KONZOLNA DVIHALA dvižna rešitev za lažje manipuliranje z bremenom

Dvižna rešitev za specifične potrebe / Lifting solution for specific needs

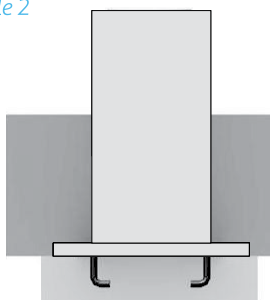

- načrtovanje in izdelava glede na potrebe
own production and custom made
- cev ali steber je zasnovan tako, da zagotovi maksimalno oporo in minimalno deformacijo pri dvigovanju bremena
the steel pillar is designed with max. stability and strength
- PRITRJEVANJE IN MONTAŽA / *Free standing mounting styles*

Stil 1 / *Style 1*

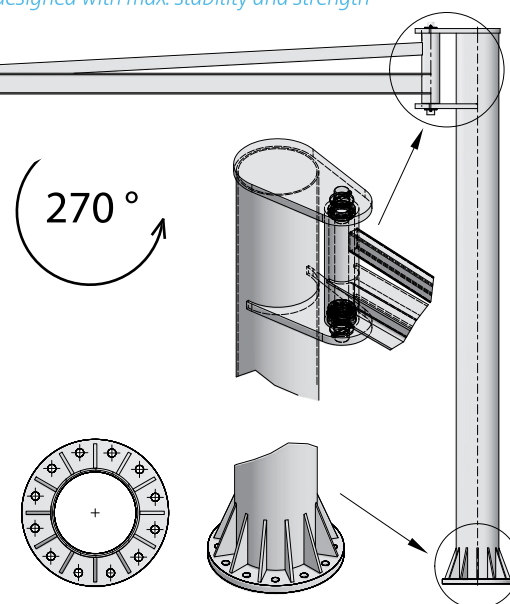

Jeklena podložna plošča pritrjena s sidrnimi vijaki
(TSA sidrni vijaki ali lepljenje vijakov)
*Steel base plates secured with anchor bolts
(TSA anchor bolts or bolts sticking)*

Stil 2 / *Style 2*

Vbetoniran podstavek (fiksna pritrditev)
Insert mounted (permanent mount)

Višina dviga in nosilnost glede na potrebe / Lifting height and capacity according to the needs

LIFTING EQUIPMENT

FREE STANDING PILLAR JIB CRANES

workstation lifting solution

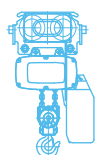

Zagotovljena stabilnost dviganja in premikanja / Great stability of lifting and moving

- sukanje kozole je ročno / območje obračanja: max. 270
pillar jib crane with manual rotation / swivel range: max. 270
- robustna jeklena konstrukcija barvana v željenem RALu
High quality powder coating robust steel construction
- upravljanje preko viseče tastature ali radijske komande
manage through drifting keyboard or radio control

- enostaven dvig, hiter transport in natančno odlaganje bremena
all types of workpieces can be lifted and transported quickly and easily and deposited gently and precisely

STENSKO KONZOLNO DVIGALO

dvižna rešitev za lažje manipuliranje z bremenom

Dvižna rešitev za specifične potrebe / Lifting solution for specific needs

- možna popolna prilagoditev spreminjajočim se potrebam v proizvodnem procesu in na specifičnem delovnem mestu
flexible in use and adaptable to changing production requirements and operating environments
- prilagodljive dvižne rešitve, ki ustrezajo tudi najzahtevnejšim potrebam na posameznem delovnem mestu
customizable lifting solutions that meet even the most demanding workstation needs

Višina dviga in nosilnost glede na potrebe / Lifting height and capacity according to the needs

LIFTING EQUIPMENT

WALL MOUNTED JIB CRANE workstation lifting solution

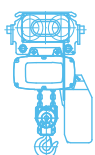

Zagotovljena stabilnost dviganja in premikanja / Great stability of lifting and moving

- sukanje kozole je ročno / območje obračanja: max. 270 °
pillar jib crane with manual rotation / swivel range: max. 270 °
- robustna jeklena konstrukcija barvana v željenem RALu
High quality powder coating robust steel construction
- upravljanje preko viseče tastature ali radijske komande
manage through drifting keyboard or radio control
- montaža na jekleni ali betonski steber ali direktno v steno hale
mounting on steel or concrete pillar or directly into the hall wall
